Website Plan

Goals

As this website has no predecessor, the current goals are simple.

- Create an attractive website that will increase interest in MissChey's (online name) art by at least 30% (Measured through user satisfaction polls or through general popularity of the website).
- Increase revenue by at least 30%.
- Create an online gallery to allow potential customers to easily be able to view examples of the product (Satisfaction can be measured through polls or direct customer feedback.)

Target Audience

Generally, this website aims to attract people who have an interest in art but lack the experience or skill to do it themselves. However, this can also target people who just want art commissions in general.

Colors

#7CE160

#94227E

#A1FF87

#469431

I chose these colors because they are similar to the colors of that of the artist's OC, which she seemed pleased about. The colors also represent quality and ambition.

Typography

Lua Bodoni
Jua

I chose these fonts because, while similar, Jua has a more relaxed look, making a perfect font for body paragraphs while Lua Bodoni is sharper, making perfect headings.
